## To the Edge of Stars

[Verse] Floating through the cosmic night  
Whispers of the moon so bright  
Echoes of the dreamer's flight  
Chasing stardust out of sight

[Chorus] We're just shadows in the dark  
Dancing with a glowing spark  
Searching for a distant mark  
Guided by a love so stark

[Verse] Breath of planets we inhale  
In the silence Dreams unveil  
Galaxies that tell our tale  
Wandering where hearts prevail

[Bridge] Drift on through the Milky Way  
Leave behind the light of day  
Stars will guide our lost ballet  
In the void where hopes will stray

[Chorus] We're just travelers on high  
Reaching for the endless sky  
Shooting stars that never die  
In each other's arms we lie

[Verse] Time dissolves in velvet black  
Never knowing where or back  
Sailing on this timeless track  
Till the universe fades to crack

## Starbound Dreams

[Verse] Floating past the stars we chase  
In this endless cosmic race  
Gravity can't hold us down  
Here in space we'll never drown

[Verse 2] Nebulae in silent cries  
Galaxies in dark disguise  
We traverse the void so deep  
Every star a secret keeps

[Chorus] Starbound dreams in endless night  
Luminous our hearts alight  
Wander through the astral dust  
In the cosmos we place our trust

[Bridge] Solar winds and comets' rush  
Universe begins to hush  
In the quiet we find peace  
From the Earth our souls release

[Verse 3] Through the dark the light will bend  
With each phase a new ascend  
Stardust flows in our embrace  
Time and space collide in grace

[Chorus] Starbound dreams in endless night  
Luminous our hearts alight  
Wander through the astral dust  
In the cosmos we place our trust

## Into the Shadow of Stars

[Verse] In the void where shadows dance Metal wings and cosmic trance Whispers hum in ghostly tones Silent screams through fractured bones

[Verse 2] From the depths of darkened space Twisted forms and frozen face Echoes of the past collide In the dark No place to hide

[Chorus] Danger waits in starlit voids Gravity a broken joy Burning thrusters Feel the heat In this cold Your heartbeats fleet

[Verse 3] Galaxies like shattered glass Destiny A painful mask Circuits hum with lifeless grin In the dark We can't begin

[Chorus] Danger waits in starlit voids Gravity a broken joy Burning thrusters Feel the heat In this cold Your heartbeats fleet

[Bridge] Lost in endless blackened seas Fleeting hope on bended knees Burning stars with silent cries In the dark Truth never dies

## Void's Embrace
